

## Making it in Today's Economy: Top Counties in the U.S. for Manufacturing

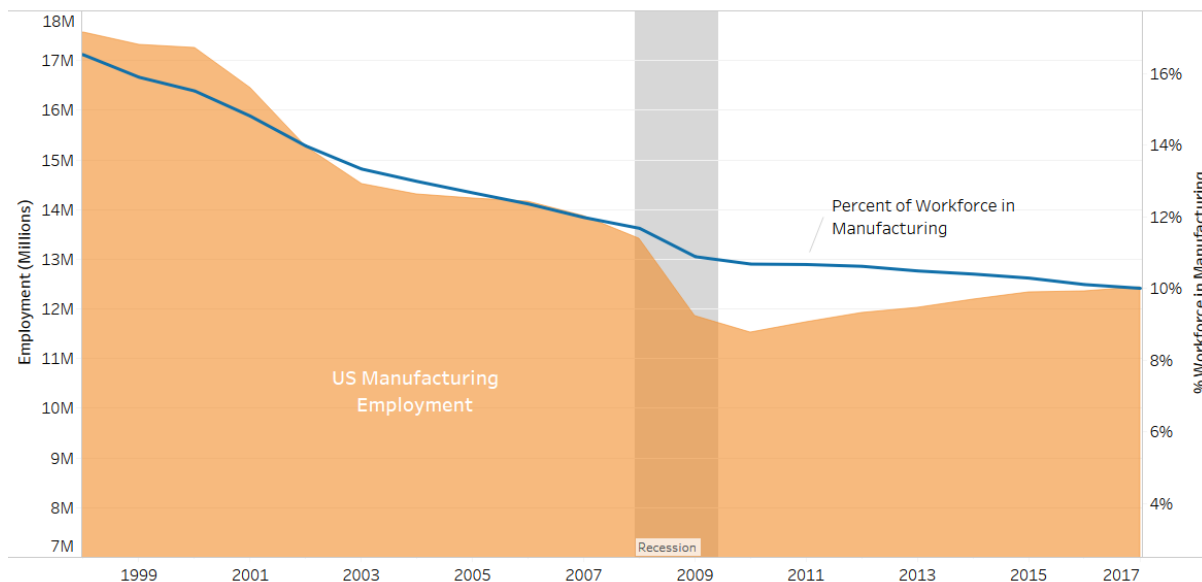

*The focus on manufacturing employment has long been part of the economic landscape as its multiplier effect is significant and benefits many sectors. The past twenty years have been a roller coaster for manufacturing employment, but those communities with a strong manufacturing workforce stand to benefit. This article will take a brief look at manufacturing employment at the national, state, and county levels highlighting top states and counties.*

Cyndi Dancy, Research Director, Garner Economics LLC | email [cyndi@garnereconomics.com](mailto:cyndi@garnereconomics.com) | web [www.garnereconomics.com](http://www.garnereconomics.com)

Manufacturing employment in the United States increased after the end of the recession in 2009, adding 916,000 jobs over the past seven years. Although employment has recently grown, the percent of workers in the manufacturing sector has decreased from approximately 17 percent in 1998 to 10 percent in 2017. The portion of the U.S. workforce engaged in manufacturing has steadily declined for decades and has been at 10 percent for the past five years.

It is no surprise that California and Texas are home to over half the counties on the top ten list of counties with high levels of manufacturing employment. Los Angeles County has the highest manufacturing employment in the nation, far above number 2 on the list, Cook County, Illinois. Each of these counties are located in large, populous metro areas with strong manufacturing drivers such as proximity to ports, rail, and interstate networks which provide access to suppliers and ease of distribution.

### Top Ten Counties: Manufacturing Employment 2017

Sorted by 12-Month Average Manufacturing Employment Ending Sep 2017

County, State	Total Employment	Manufacturing Employment	% Workforce in Manufacturing
Los Angeles County, California	3,805,699	348,092	9.1%

The manufacturing leader by county for each state varies greatly. Several cities rank at the top of their state for areas that define municipalities as county-equivalents: Anchorage, Alaska, and Newport News, Virginia. Once again, populous areas figure prominently on this list with strength of numbers figuring into power of manufacturing workers.

This changes significantly when the share of manufacturing employment is examined as a portion of total employment. Counties with a high percentage of their workforce engaged in manufacturing tend to be less populated counties but have more than half of their employment in this sector. Aleutians East Borough, Alaska is the top county with a very concentrated 89.3 percent of their workers in manufacturing. This area, along with nearby Bristol Bay Borough, Alaska (#6) has a seasonal manufacturing

strength involved in food processing. These two Alaskan borough's average employment experiences a boost in the second quarter, some years much more pronounced than others.

Calhoun County, Arkansas, is number two on the list with 78.5 percent of their workers in manufacturing. Highland Industrial Park, a former Navy facility, is located in Calhoun County and is now home to a defense cluster featuring several companies.

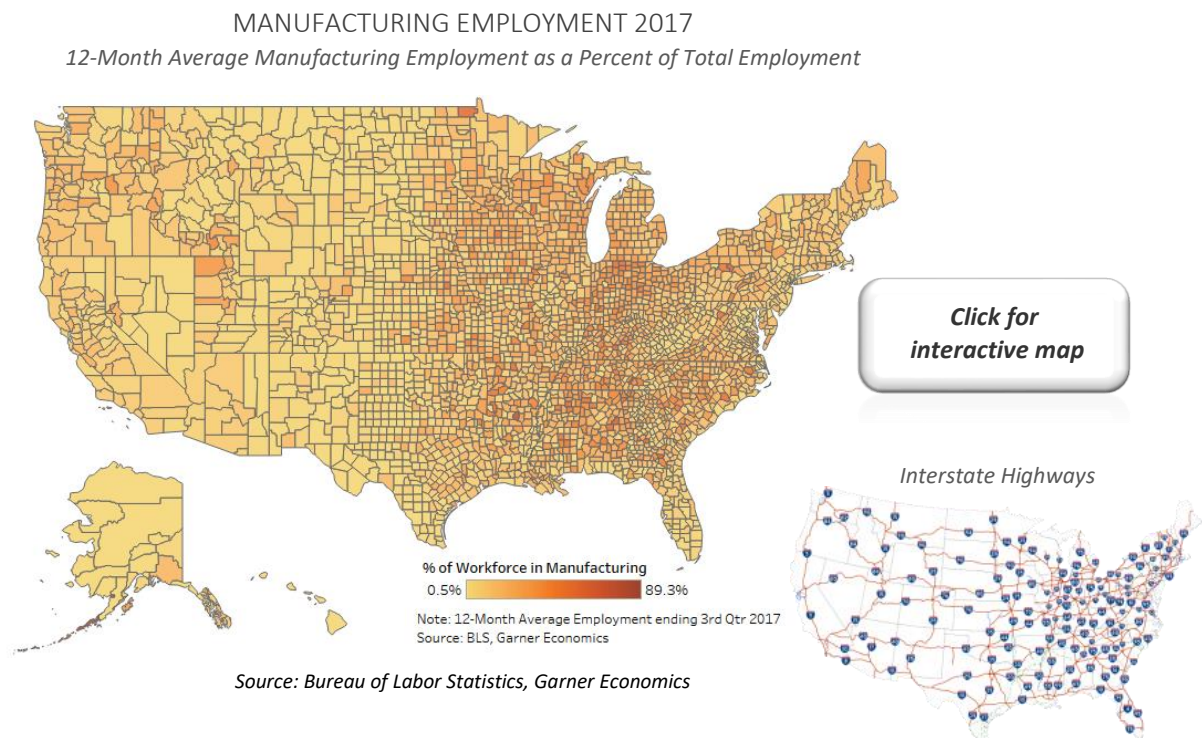

## Top Ten Counties: Manufacturing Employment 2017

Sorted by 12-Month Average Manufacturing Employment Ending Sep 2017

County, State	Total Employment	Manufacturing Employment	% Workforce in Manufacturing
Aleutians East Borough, Alaska*	2,154	1,923	89.3%
Calhoun County, Arkansas	2,574	2,020	78.5%
Hancock County, Kentucky	3,564	2,464	69.1%
Clay County, Alabama	3,098	2,037	65.8%
Dooly County, Georgia*	2,894	1,856	64.1%
Bristol Bay Borough, Alaska	988	624	63.1%
Hart County, Kentucky	4,376	2,685	61.4%
Cameron County, Pennsylvania	1,579	962	61.0%
Atkinson County, Georgia	1,608	963	59.9%
Meigs County, Tennessee	1,566	928	59.3%

\* Manufacturing Employment based on released data for 6 months. Remaining monthly data is suppressed due to disclosure standards

Source: Bureau of Labor Statistics, Garner Economics

The map above highlights those counties with high percentages of manufacturing employment in the United States based on 12-month averages. The distribution of these manufacturing counties closely mirrors the concentration of interstate highways primarily through the Midwest and Southeast portions of the United States. The above visual reinforces the necessary elements of transportation for manufacturing growth.

There is widespread discussion on the future of manufacturing in the U.S. Manufacturing is still a coveted sector for communities because of its high multiplier effect. The number of people engaged in manufacturing has increased since 2010, however the percentage of our nation's workforce in manufacturing has decreased. Counties and metro areas with dense population tend to have the largest manufacturing workforce by volume but many counties have leveraged natural and other resources to capture jobs in the high value manufacturing sector.

## U.S. Counties: Manufacturing Employment 2017

### 12-Month Average Manufacturing Employment Ending Sep 2017

The table below lists manufacturing employment and this sector's percentage of total employment. These are based on 12-month averages from the Bureau of Labor Statistics (BLS) for covered employment. Some counties are not listed due to lack of data from the BLS within the last 12 months. This could be that no manufacturing jobs were reported or that data did not meet disclosure standards. Often disclosure standards protect the confidentiality of employers. Data the BLS categorizes as *Unknown or Undefined Areas* were not included. In all, 2,800 counties, or 93 percent of all counties are included in the list below.

County	Avg Mfg Employment	% Mfg Employment
Abbeville County, South Carolina	1,769	44.2%
